

AFRICA CUP

HYDRO-IT

<https://hydroit.wixsite.com/mysite>

Hydro-IT is an IoT startup with our first product to market aimed at reducing and eliminating water leaks for municipalities. Our technology helps cities align with sustainable development goals and revolutionize them into SMART Cities

NANOSTREAM BLU

<https://nanoblu.net/>

NanoStream Blu creates intelligence from information. We connect to an institution's database and auto-generate the advice and insight needed to improve operations.

AFYAREKOD

<https://www.afyarekod.com/>

AfyaRekod is a decentralized, AI-powered, patient-owned electronic healthcare record, where people can conveniently upload and store in real time their health data, engage with doctors and control their access to health and telehealth services. The platform also allows for the health care institutions to store their patients' records and provide them with healthcare support physically and remotely.

PRICEPALLY LIMITED

<https://pricepally.com>

Pricepally is a digital food cooperative for African cities that enables people to buy food in bulk or share bulk food items among a group sourced directly from farmers or wholesalers, making it cheaper and fresher than retail.

LUMA LAW

<https://lumalaw.co.za/>

We enable access to affordable and accessible on-demand legal assistance through our chatbot. The Luma Law chatbot is a legal information service utilising chat platforms that are familiar and accessible to users such as whatsapp and facebook messenger to disseminate information and to allow for real time feedback; It utilises artificial intelligence and machine learning to enable scale as the chatbot is available 24h/ per day allowing for convenience and massive scale.

HYDRO BLU

The Hydro Blu company uses 4IR technology to increase access to drinkable water supply in vulnerable regions. To achieve this, the company is piloting a predictive software system that enables hydrogeologists to make data-driven decisions when identifying suitable locations to drill sustainable boreholes. Specifically, the company applies modern methods of Spatial Data Science, Geographic Information Systems, and Machine Learning on global geo-datasets from industry leaders such as NASA Earth Data, Google Earth Engine and ESRI ArcGIS.

FUNDI APP TECHNOLOGIZ

<https://www.fundiapp.com>

Access to decent work is one the biggest challenges facing millions of youth in Africa today. Fundi App uses on-demand digital technologies to connect vetted handymen who provide different types of installation, repair and maintenance services in the informal sector to customers in the wider market, both domestic and commercial.

INCLUSIVITY SOLUTIONS

www.inclusivitysolutions.com

Inclusivity Solutions designs, builds, operates and innovates digital insurance solutions that enable financial inclusion and address the protection gap in emerging markets. We partner with mobile operators, banks, insurance companies and other financial institutions to deliver simple and affordable insurance cover through mobile phones.

ZONOTHO (PTY) LTD

<https://beta.zonotho.com>

Zonotho is a groundbreaking app that is solving what we believe is one of the next great frontiers – personal finance and financial services. Our app is a personal finance hub where users access content created by financial experts, advisers, bloggers and other users.

FINVEX.TECH

<https://finvex.tech/>

Finvex.tech is a B2B fintech. Our purpose and ambition is to unlock working capital for working supply chains. Our accounts payable model incentives corporate's to use their existing accounting data to free-up access to affordable working capital for their SME suppliers - at the same time as enhancing the security and profitability of their own supply chains.

ZUWA ENERGY

www.zuwaenergymw.com

Zuwa Energy has taken last mile distribution of productive household solar energy and appliances to the next level and is on a mission to end energy poverty in Malawi and the neighbouring countries. As a second generation pay as you go company, we apply a B2B model on the supply side while on the demand side, our highly trained Energy Entrepreneurs are just a stone throw away from the next customer who will be taken on a life changing user experience journey through story-telling and interactive data.

The main business of Zuwa is to provide low income people earning as low as \$5 per day with affordable, clean and reliable solar energy to meet their everyday energy needs for both household and business use through pay as you go asset financing. In addition to the positive impact that our products deliver to our customers, 30% of our profits are donated to charity to further support vulnerable women and children in Malawi.

EJOOBI

www.ejoobi.co.za

ejoobi is an HR tech platform. Our team has gained skills to design, develop cloud platforms, chatbots, machine learning solutions, SMS & WhatsApp integrations to existing or new platforms. We help employers work efficiently to meet their hiring needs with an HR communication platform that screen and matches talent through using AI.
