www.keneilwelactations.com

Keneilwe Lactations | Keneilwe & Peter-John Goeieman

Keneilwe Lactations is a lactation cookie brand. Lactation cookies aid and stimulate breastmilk supply in breastfeeding women who struggle to naturally produce sufficient milk. We also offer a freemium model in the form of free tips and information based on breastfeeding and the motherhood journey (research and experience based). This business was started because the founder, Keneilwe Goeieman, experienced a low breastmilk supply with her then new-born. We have a national footprint which we achieved in one and a half months since inception, as well as international interest from countries such as Nigeria, USA, India, among others.

Stage: Pre-seed
Investment Ask: R2 700 000 | \$150 000
Industry: Food and Beverage
www.littlefoodease.co.za

Little Foodease | Louisa Gibbons

Little Foodease addresses the lack of essential nutrition and stimulation in early childhood by focusing on early childhood development through three sections. Firstly, they offer frozen baby and toddler food in four stages that are dietician approved and contain 100% goodness with no added salt, sugar, colourants, or preservatives. Secondly, they provide silicone tableware that makes mealtimes stress-free and mess-free, with clever and safe products for on-the-go lifestyles. Finally, they offer sensory play for brain development, allowing children to learn 30 times faster through play while developing crucial skills and calming anxiety.

Investment Ask: N/A
Industry: Agriculture
www.sproutfarms.co.za

Sprout Farms | Kamlin Reddy and Deshni Subbiah

Sprout Farms is a technology driven organisation that exists to reduce the carbon footprint and water usage within the agriculture sector and make high-quality fresh produce more accessible to the growing urban population. This is achieved by removing the dependency on heavy machinery and long-haul transportation from farms to urban distribution centres and retail stores by growing produce in urban areas within 10km radius of the customer. The significant benefits of growing vertically using controlled environment agriculture is the elimination of harmful pesticides that will offer customers a safe, healthy and organic option when purchasing.

Stage: Early Stage
